

A LOAD of misery is taken from women by Dr. Pierce's Favorite Prescription. Weakness, that distressing condition which can be relieved and cured by it, safely and certainly. It has done this for thousands of suffering women...

Dr. R. V. PIERCE: Dear Sir—Nipe is a case of eleven years' standing, which defied the skill of the best medical aid procurable. I obtained no good effect, until I began the use of the "Favorite Prescription," which lifted the burden which was weighing my life. My grateful thanks to the "Prescription." I remain, sincerely,

Evoline Neil

Those who never read the advertisements in their newspapers miss more than they presume. Jonathan Kenison, of Iowa, who had been troubled with rheumatism in his back, arms and shoulders read an item in his paper about how a prominent German citizen of Ft. Madison had been cured. He procured the same medicine, and to use his own words: "It cured me right up." He also says: "A neighbor and his wife were both sick in bed with rheumatism. Their boy was over to my house and said they were so bad he had to do the cooking. I told him of Chamberlain's Pain Balm and how it had cured me, so he got a bottle and it cured them up in a week. 50 cent bottles for sale by all druggists."

COAL TRADE OF NEW ENGLAND

American Miners Able to Undersell the Nova Scotians. SOME FACTS AND FIGURES

The New York and New England Railroad Company has Contracted for 50,000 Tons of Bituminous Coal From Pennsylvania at \$2.50 Per Ton.

Within a few days the New York and New England Railroad company has contracted for 50,000 tons of bituminous coal from the Beech creek region of Pennsylvania, to be delivered in Boston at a cost of \$2.50 per ton, says the Philadelphia Record. This should lay the Nova Scotia tugaboo, which has been scaring the Pennsylvania, Maryland and Virginia coal operators, who have predicted ruin to their New England trade as the result of the reduction of the duty from 75 cents to 40 cents per ton.

The placing of this large contract indicates that the Pennsylvania mine owners still have a firm hold on the New England market. The Nova Scotia coal dealers are offering their coal in Boston, duty paid, at \$2.85 per ton, a price which the domestic miners are able to meet without difficulty. Although Nova Scotia coal has not yet secured the New England market, the reduction of 35 cents in the duty seems to have been a substantial benefit to that section by forcing down the price of American fuel. For the coal which the New York and New England Railroad company has just bought at \$2.50 there would have been paid \$3 last year and \$3.25 in 1893.

THE GOLD BRICK SWINDLER. He Introduced the Trick and Became Rich on the Trick.

The body of Rev. Waddell, the inventor of the "gold brick" swindle, who was shot and killed at the Northern railway station in Paris on March 27 by Tom O'Brien, the so-called king of bunco men, reached New York recently.

Waddell was the first man to introduce the "gold brick" swindle. He had a block of metal the size of a brick made and had it carefully gilded. In different parts of the brick he inserted small nuggets of pure gold, and when he found a victim would let him chip off a nugget and take it to a jeweler for assay. The jeweler would always announce that the sample was pure gold.

Waddell was very successful with his "gold brick" swindle and never made less than \$3,500 on a single sale. He would tell a story about having received the brick from somebody who had stolen it from the mint or burglars who had had the spoils of a robbery melted down, and his victims invariably took the bait.

He amassed considerable money, and at the time of his murder was believed to be a prosperous American business man, who was resting from his labors. He had \$35,000 in cash in his possession at the time he was shot.—New York Telegram.

MR. CLEVELAND DIDN'T TELL. It Will Be Long Before a White House Clerk Will Be Envid Again.

Once in awhile President Cleveland gets by Mr. Thurber and invades the room occupied by the subordinate clerks in the White House. On one of these occasions recently he went and stood looking down at the work which one of the clerks was doing. The man at work never looked up. He thought it was one of the other clerks who occasionally bothered him. "What the devil do you want?" he asked.

There was no response. The other clerks gasped for breath. A deathlike stillness prevailed, and the working clerk looked up to meet a smile on the countenance of the president. In time an explanation followed, but it will be a long time before that White House clerk will ask a like question until he is dead sure of the man he is talking to.—Philadelphia Record.

CAUGHT ON THE WING. A Buzzard Spitted on a Locomotive of a Train in North Carolina.

When the Seaboard Air Line train ran into the Union station at Raleigh a few days ago, it brought an unwilling and dying feathered passenger. It was a huge buzzard.

Engineer Nowell said that soon after leaving the town of Apuz, 15 miles from there, he was running 30 miles per hour. He saw a buzzard flying very low toward and across the track. In a twinkling he saw a fluttering object on one of the brass rods which extends the whole length of the boiler. The bird had been struck by this rod and was pierced through and hung impaled thereon.

When the train came to a standstill, the buzzard fell off and gasped its last in the presence of a number of people.—Washington Star.

DYSPEPSIA VS. ELECTROPOISE

ALBANY, Va., November 20, 1894. In hopes that it may encourage some dyspeptic, I send you the following report of my case after using the Electro-Poise for three months. My trouble, Nervous Prostration, was caused by indigestion and the excessive use of drugs to prevent the return of the fever. I was under the treatment of four of the best physicians in the hospital for a year without receiving any permanent benefit, and was finally advised that my only chance of retaining my health was by leaving a quiet life in the mountains. I took a quiet life, and had not taken a single dose of medicine for more than two years. At the suggestion of a relative, I sent for the Electro-Poise, which I began using on August 25, 1894. I followed all your instructions, and today I am a well man, and will, I think, in a short time be as strong as any man in my life. In conclusion let me say that I owe a great debt of gratitude to every man of hygiene, and to the simple directions are followed. You are at liberty to see this, if you deem it of any advantage to the advancement of the wonderful instrument, wishing you all possible success. I am yours truly, J. NESBIT SMITH, December 1, 1894. Mr. Smith says: "I cheerfully recommend the above."
